Projects

1. **Coffee Shop Sales Analysis (Excel Project)** <https://github.com/Shruti-N21/Excel-Coffee-Shop-Report>
 - Cleaned and prepared coffee shop sales data by removing duplicate and null records.
 - Created Pivot Tables and charts to analyze sales, customer footfall, hourly orders, product categories, store locations, weekdays, and order sizes.
 - Identified peak ordering hours and compared sales performance across store locations.
 - Analyzed product performance and identified top-selling and low-performing products to highlight potential sales opportunities.
 - Delivered actionable insights into customer preferences, product demand, and store-level performance.

2. **HR Analytics Dashboard | Power BI(Power BI Project)** <https://github.com/Shruti-N21/Powerbi-Blinkit-project>
 - Built an interactive Power BI dashboard to analyze employee attrition and identify high-risk employee segments.
 - Analyzed **1,470 employees**, **237 attritions**, and an overall **16.1% attrition rate**.
 - Created KPIs and visualizations for attrition by education, age group, salary slab, and job role.
 - Identified employees aged **26–35**, employees earning up to **5K**, and **Laboratory Technicians** as key high-attrition segments.
 - Presented actionable HR insights to support employee retention, workforce planning, and data-driven decision-making.

3. **Pizza Sales Analysis – (SQL Project)** <https://github.com/Shruti-N21/SQL-Pizza-Sales-Project>
 - Analyzed pizza sales data using SQL to evaluate overall sales performance and customer ordering patterns.
 - Calculated **21,350 total orders** and **\$817,860.05 total revenue** using SQL queries.
 - Identified the **Greek Pizza** as the highest-priced pizza and **Large (L)** as the most frequently ordered size.
 - Analyzed pizza types by order quantity and identified **Classic Deluxe Pizza** as the top-performing pizza.
 - Generated business insights to support menu planning, inventory management, and sales strategy.
